

## The Rangeland Journal

*The Rangeland Journal* is the official journal of the Australian Rangeland Society, which publishes original work that makes a significant contribution to understanding the biophysical, social, cultural, economic, and policy influences affecting rangeland use and management throughout the world. Rangelands include all those environments where natural ecological processes predominate, and where values and benefits are based primarily on natural resources.

Papers may present the results of original research, contributions to theory or new conclusions reached from the review of a topic. Their structure need not conform to that of standard scientific articles but writing style must be clear and concise. All material presented must be well documented, critically analysed and objectively presented. All papers are peer-reviewed.

An International Journal for managing natural resources, improving remote living and sustaining businesses in unpredictable and harsh environments, especially in arid regions.

### Features

- International coverage and readership
- High impact science
- Global circulation
- Critical reviews
- Research articles
- Management analysis
- Rigorous and constructive refereeing
- Issues loaded online paper by paper
- No page charges
- Open access author fee available
- Full digital archive
- Full text articles available in HTML with CrossRef links
- 9 year cited half-life

### Topics published

- Biodiversity conservation
- Domestic animal and wildlife production
- Cultural and heritage values
- Economics of resource use
- Landscape ecology
- Niche market production systems
- Rangeland governance
- Resilience of systems
- Rural people and communities
- Social and technical services on remote settlements
- Soil, plant and wildlife biology/ecology
- Tourism
- Water resources

## Editor

- Dr 'Wal' Whalley, Botany, The University of New England, Australia

## Associate Editors

- Dr Andrew Ash, CSIRO Sustainable Ecosystems, Australia
- Dr Brandon Bestelmeyer, New Mexico State University, USA
- Dr Brian Cooke, University of Canberra, Australia
- Associate Professor Maria Fernandez-Gimenez, Colorado State University, USA
- Professor Bernard Hubert, National Institute for Agricultural Research, France
- Professor Ruijun Long, Lanzhou University, China
- Mr Neil Macleod, CSIRO Sustainable Ecosystems, Australia
- Professor John Milne, University of Aberdeen, Scotland
- Dr Esther Mwangi, Harvard University, USA
- Dr 'Ben' Norton, Utah State University, USA
- Dr Mark Stafford Smith, CSIRO Sustainable Ecosystems, Australia

## Recently Published Papers
